

SUN BEAMS

By WALTER M. BARRETT

With the salaries of the two full-time deputies in the west end of the county boosted from \$125 to \$150 a month, the east section is still without the protection of a paid deputy of any description. And we find that in the Meadow Lake Township there are 1124 registered voters.

In spare moments, we pour over the propaganda submitted as "news releases" from the many political aspirants far and wide and if one could take any of them too seriously we would be inclined to vote for all. Fortunately we have been sufficiently educated along lines followed by the aspirants to pay little attention to much of the "literature." Nevertheless, we must be guided to some extent by those pleas and from some select our choice. Up here on the mountain, so to speak, we have little opportunity to contact our future "servants of the people" and must be guided by what we read and hear. We caution, therefore, to read well and listen closely. There are many "bugs" in most of the information you receive these days, be you a Democrat or Republican no one is likely to give you something for nothing.

We wonder what ever happened to those well laid plans to seek incorporation for Truckee. Maybe just another bubble that couldn't take it.

Letters are being dispatched to the local businessmen and others seeking opinions on the local relief work program. An investigation has shown the good results obtained, but the small amount appropriated by the chamber of commerce is more than depleted and unless more money can be advanced, the program, despite its worth to the community, will be forced to close. An answer to the letter will indicate your desire.

Unless Truckee interests raise sufficient capital to pay the local share of feed the 175,000 trout fry still being held at Tallac Hatchery, there will be no fish raised for the Truckee river this fall. That was the fact contained in a communication from D. E. Kessler, San Francisco Fly-casting club president, received this week. Petitions have been available for two weeks, but the results have not been as anticipated and so this week will very likely tell the story and unless Truckee's share—half the actual feeding cost—is raised, it will no doubt be a sad story.

Unverified rumors that motor traffic from the east is being diverted south in Utah because of the "impassable conditions on northern routes" should be investigated and if found true, stopped. We admit the road for a few miles is none too good because of repairs, but if those reports are true they are costing northern cities considerable money and towns like Truckee are the heaviest sufferers.

Mattson Suspect Proves Alibi In Probe By Federals

Man Arrested Here Was In East When Tacoma Boy Was Slain

HELD ON BOY CHARGE

Young Traveling Companion Involved In Probe By Officers

A press dispatch from San Francisco says that N. J. L. Pieper, in charge of the San Francisco regional office of the federal bureau of investigation, announced that Herman DeVall, 28, arrested by Deputy Sheriff N. F. Dolley and State Patrolman F. E. Walker, definitely has been eliminated as a suspect in the Mattson kidnapping case.

He declared the Omaha office of the bureau established that during the period in 1936 that 10 year old Charles Mattson was taken from his home at Tacoma, Wash., and murdered DeVall was in the Nebraska City, his home.

Following his arrest with a 15 year old youth on a freight train here, DeVall was grilled by local officers including Sergeant C. E. McKen of the highway patrol, Walker and Dolley. He at first admitted then denied any connection with the Mattson case.

The suspect was removed to the County jail at Nevada City where he was detained on morals charges involving his young traveling companion.

LAKE TAHOE GATES ARE AGAIN PARTLY CLOSED

RENO, Aug. 1.—The Truckee river water master Saturday reduced the flow of water from Lake Tahoe into the Truckee river from 500 to 190 second feet.

A heavy rainstorm last week raised the lake level to 6228.82 feet above sea level and the outlet gates were opened wider in order to prevent any possible damage to lake front property.

The lake level was down to 6228.81 Saturday and the gates were again closed partly.

67 Cases Net Local Justice Fines of \$500

Justice of the Peace C. E. Smith during the month of July handled 67 cases in the local court and turned over to the county a total of \$500 in fines and \$1 in fees. The fines, most of which were from violators of traffic laws, ranged from a low of \$2.50 to high of \$25.

The local docket shows three violators of the county's sobriety ordinance pay a total of \$75 an one reckless driver and one hit and runner each paid \$25.

Speeding, passing on curves and other infractions of the laws of the road made up the balance.

Only a small portion of the money collected ever finds its way back to Truckee where it was assessed.

Negro Stabber Given Floater After Charge Not Pressed In Court

Local Man Fails to Charge Negro In Stabbing On Local Street

The 15 year old Negro youth, who gave his name here as Jack Johnson, arrested following a fight on the main street in which James Graves, 34, Boca dam worker, suffered severe knife wounds in the back and right arm, has been ordered to leave the county by Superior Judge Raglan Tuttle. Graves, it was reported did not appear against the Negro to file charges.

Johnson was arrested following a thrilling chase down the street with nearly 100 men, many of them friends of Graves in pursuit. Turned over to Constable William Botcher, the boy was held in jail here a few hours then taken to Nevada City when threats of violence were heard.

Johnson claimed he stabbed Graves in self defense, although witnesses of the affair denied this was the case.

FUNDS BEING RAISED TO FEED TROUT FOR LOCAL STREAM

With approximately \$100 raised and only a few contacted, it is indicated that Truckee this year can again be counted upon to contribute its share to the fish raising program in cooperation with the San Francisco Fly-casting club.

The fish and game commission has been requested to deliver the 175,000 rainbow fry to the club's rearing tanks at the clubhouse where E. H. Hommon, expert fish raiser will have charge of the caring for the trout.

After being held in the tanks for two months, the fry will be freed into the Truckee river for next year's crop.

After four hours of battle by more than 60 men, the fire which started shortly afternoon in Juniper Creek canyon, about seven miles east of Truckee was brought under control late yesterday.

The fire swept over approximately 10 acres, including a great deal of timber land, after starting in the dry grass along the creek. The cause had not been immediately determined but may have been from a careless smoker, fishing along the stream.

The Truckee fire suppression crew was augmented by the CCC men at the Boca camp. Report of the fire came from the Sardine and Crystal lookout stations.

Many fine fishing expeditions have organized at Tahoe and most of the streams there are turning out fine limits and Tahoe as usual is good.

Truckee Relief May Be Halted As Funds Short

Scores of Men Have Been Given Work Here On Local Project

NEED MORE MONEY

Letters Urge Opinion on Plan To Continue Relief Work Here

Lack of funds threatens to bring a halt to Truckee's relief program, instituted here two weeks ago for a double purpose, both of which have succeeded beyond expectations. These purposes were:

1.—To give assistance to deserving transients who were willing to accept a small wage in exchange for a few hours work and thus eliminate all panhandling and mooching on the streets and at homes.

2.—To put the local recreational field and equipment in condition for winter sports and accomplish any other necessary civic project which is justified.

C. Edmunds, administrator of the project, announced that scores of men who were actually in dire distress but willing to work, had been given small sums for their labors. Frank Powell, foreman under whose direction the work is done, stated that considerable necessary work has been accomplished, but that a great deal remains to be done.

The chamber of commerce, is giving the plan a fair trial, appropriated the sum of \$50 to go into the project. This sum has been more than spent and unless more funds can be secured at once, the project will be ended.

A form letter, requesting opinions and donations from those who have benefited and will continue to be benefited, are being sent out by the chamber of commerce. Replies to these letters will determine the future policy of the Truckee relief program, but in the meantime efforts are being made to solicit county or state aid to carry on as started.

Under the plan now employed a man is permitted no more than two hours work at 25 cents an hour. This, it was decided, would give the man a good meal and an opportunity to continue on his travels where he possibly can secure a job.

"RELIEF BUMS"

A news item tells of a negro taxi driver who was unable to work for a time because of illness. He obtained \$50 from a government agency to tide him over. Now he is back at work, and is trying to return the money. When it was pointed out to him that he was not legally obligated to do this, he observed that "that was the way I was raised—and that's the way I'm raising my child."

A great many other Americans can learn a lesson from this negro taxi driver. One of the most ominous portents on the horizon is the fact that thousands of people have apparently come to look upon relief as a "profession." They plan to make it their "life work." Productive jobs in private industry hold no attraction for them, when they can take it easy at the taxpayers' expense. They figure someone owes them a living.

This isn't a criticism of those people who have turned to as soon as opportunity for a real job comes along. Nor is it a criticism of relief per se. The hungry must be fed, the homeless sheltered, the clothesless clothed. Honest beneficiaries of relief aggressively seek real employment. Professional "relief bums" are a new menace to democratic government.

The negro's statement was news because his attitude was so unusual today. It should be printed on every relief check and public grant.

\$43,000,000,000,000 IN THE RED

One year from now, the federal debt will be in excess of \$43,000,000,000. If relief expenditures continue, which seems likely, it may go far beyond even that statospheric figure.

In the light of that fact, is it any wonder that business is worried—that the investor is discouraged—and that unemployment is near the record level? Government, like an individual, can spend beyond its income just so long.

If the next congress wants to avert the sad end, it will give thorough and immediate attention to the tax and debt problem. Until an honest start is made toward a balanced budget and regular debt reduction, we can't have good times in this country.

We have been trying to remember how many times within the past few months we have been promised a full-time game warden in the Truckee region. Nearly everyone with any amount of authority at all, who expects to gain from Truckee's good will, it seems, has made the promise. Maybe the promises were made in good faith and forgotten or maybe they were only oil on troubled water. At any rate they have never been filled.

GENE RE WILL SAVE ONE EYE AFTER SERIOUS ACCIDENT

TAHOE CITY, Aug. 4.—Gene Re has left the San Francisco hospital to which he has been confined and is now at his home in San Jose. Although the report is prevalent in Tahoe that both his eyes were removed following a serious accident recently, this is not the case. After an all day examination the specialists engaged by his father, Joseph Re, decided to operate and one eye was saved. Daily trips to the city for treatment will be necessary for some time, according to reports.

WOMAN BURNED AS HOME DESTROYED AT ECHO RESORT

TAHOE CITY, Aug. 4.—The Echo Lake home of Robert Gordon Sproule president of the University of California at Berkeley was totally destroyed by fire on Saturday when gasoline from a bottle was spilled on the floor of the kitchen. It is believed the fumes were ignited either from a burning gas jet or from the pilot light left burning in the room.

Mrs. William G. Donald in the kitchen alone at the time was painfully, but not critically burned about the face, chest and body following the explosion. It is believed she was using the gasoline to clean clothing at the time. Her cries for help were answered by neighbors who rushed to her assistance. Her three children nor her husband, Dr. William G. Donald, physician at the university, were not present at the time.

Mrs. Donald was rushed to a Reno hospital for treatment and later was taken by airplane to Oakland where she entered the Alta Bates Sanitarium.

There were some 150 homes in the vicinity of Echo Lake and prompt action by the volunteer fire department, prevented spread of the fire to other homes. The damage was estimated at \$4000, only a boat and motor being saved.

The Sproule family is traveling in Europe at the present time and had rented the home to the Donalds.

Miss Marie Miller and Miss Ruth Mann of Reno are enjoying a vacation at Tahoe where they are the guests at Worden's Ward Creek Camp.

TOURIST GROUP IS REORGANIZED TO DIRECT TRAVEL

SACRAMENTO, Aug. 4.—For the purpose of stimulating tourist travel to California through the northern routes, the California-Nevada Travels Association has been reorganized. With the immediate goal of directing this travel through the northern gateways to the Sacramento Golden Empire Centennial and on to the San Francisco Golden Gate International Exposition in 1939, a promotional campaign has been adopted.

This will be carried out through the distribution of 100,000 illustrated booklets and the employment of a contact man to reach tourists at strategic points in the western states showing motion pictures and giving talks on Northern California. A budget of \$10,000 has been adopted for promotional work.

At the reorganization meeting held in Sacramento last week, Arthur Ladley, secretary-manager of the Sacramento Chamber of Commerce was elected president of the association.

The association which carried out effective promotional work in past years, combines the efforts of Nevada and Northern California organizations.

-California Political Review-

According to the index of the poll recently taken by the Oakdale Enterprise of the upper San Joaquin valley Sen. Culbert Olson has good reason to fear the strength of the Progressive-Fusionist Ray L. Haight, who he opposes on the Progressive ticket to block from the general election ballot. The poll showed Olson with the highest single vote of 102 but an aggregate total of his opponents was 110. On analysis it is supposed that all of this 110 would go to Haight in a two-man show-down.

The actual count was: Olson, 102; Haight, 40; Dan C. Murphy, 27; J. F. T. O'Conner, 22; John Dockweiler, 19; William Neblett, 1; and Herbert C. Legg, 1.

Politically Speaking

by John W. Dunlap
United Press Staff Correspondent

SACRAMENTO, August 4 (UP)—Political observers who can read between the lines think Gov. Frank F. Merriam is convinced he will be opposed next November by Senator Culbert L. Olson.

It is generally conceded that Olson will be supported by the rank and file of the Committee for Industrial Organization, as well as other liberal groups. His opponents would like it known that even the Communists will back the silver-haired Democrat chairman in 1934, when Upton Sinclair carried the Bourbon banner.

Therefore, it seemed rather plain that Merriam might be shooting at Olson when the Communists were blamed this week for arousing migratory labor groups against the governor. The accusation came from Archie Closson, former American Legion Commander from Lodi, who helps puff the bellows on the Merriam bandwagon.

For that matter, this question of the potential power of the migrant cannot be overlooked. Thousands of these mid-western and southern farmers have trekked to California in search of work and homes. The U. S. farm placement bureau estimates there are more than 221,000 of these people who have entered the state in the past 30 months, many of whom have established eligibility to vote.

More than ever before, large numbers of candidates are in the field. A solid block of migrant laborers might easily put a minority candidate into office. This is what the Merriam point out as they claim the Communist workers have been busy in the migrant centers to defeat the governor.

Merriam, according to his headquarters, is being branded as Communism's NO. 1 enemy and a corporation "tool." A flood of literature is being circulated in the Sacramento and San Joaquin valleys, say the Merriamites.

And here is what Closson has to say: "The drive has as its objective the defeat of the governor in the belief that the refugees, if they vote as a bloc, hold the balance of power in the coming elections."

"When we consider that registration this year is estimated at more than 3,200,000, it readily will be seen that such calculation is in the realm of possibility. The propaganda, of course, follows the familiar Communist formula of playing on the psychology of distressed and disheartened people.

"The situation would be more disturbing were it not for the character of the refugees themselves. Reports from the interior indicate that a huge proportion, if not a majority, are earnest, industrious workers, anxious and willing to work. It is their misfortune and California's problem that

JEFFERSONIAN ASKS PROBE OF SENATOR'S CAMPAIGN FUND

James W. Mellen, Anti-New Deal Democrat for the U. S. Senate, announced today that he would ask the Senate to probe the campaign fund of Senator Olson.

They were led to come here, seeking work, at a time when there is not enough work to go around."

The conservative-liberal issue was almost a foregone conclusion as it became apparent that Merriam and Olson would be the men to beat for the nomination. While Olson was not as vulnerable as Sinclair, and certainly did not have the mass of literature that could be used against him as it was against Sinclair, the senator has been too closely allied with the liberal fringe to escape harpooning.

Merriam forces, and those of Lieut. Gov. George J. Hatfield too, privately hope that Olson goes into the finals because of the effectiveness of any attack based on left-wing criticism.

That must have prompted Merriam to sound off so definitely against the C.I.O. in his San Francisco speech concerning the eviction of the C.I.O. from Westwood. The governor probably realized that he could not get the C.I.O. vote so might as well make a play for the A.F.L. and other conservative factions that would welcome any affront to John L. Lewis and his following.

Merriam said he had sympathy for the citizens of Westwood in their fight against what he termed the Communist-led C.I.O., but he also warned against vigilantism.

Such an unqualified attack on the C.I.O. can mean only that he will emphasize that issue as the campaign warms up. And Olson is his obvious opponent in such a fight.

Charges Reds

Archie M. Closson, former commander of the American Legion and ardent Merriam supporter, this week came forth with the statement that the Communists are making attempts to organize the migrant farm workers to beat the governor. For a behind and between the lines of the battle read John Dunlap's "Politically Speaking" appearing on this page of THE SIERRA SUN.

Laird Candidate For School Post At Primary Polls

Arleigh A. Laird, principal of the North Bloomfield school, this week announced to the Sierra Sun that he is a candidate for election to the office of Superintendent of Schools of Nevada County at the August 30 primary election.

The candidate said much of his time heretofore has been taken up in other rural school districts where he has called upon to explain his policies and his work in bringing about better conditions in the less populated areas of the county. His work at the North Bloomfield school has been of highest calibre and he can point with pride to advancements made there under his administration. For instance, during the coming year a new water system will be installed at the school, the direct result of the principal's untiring efforts to promote better conditions as well as better educational facilities in his school.

Laird is an aggressive, straightforward young man, with a wide scope of experience and knowledge of the duties of the superintendent of schools and is equipped to cope with the many problems which today are besetting the rural school districts. Above all, he declared, the duties of the superintendent of schools of this, or any county, should deal primarily with the smaller school districts where guidance and aid are needed far more than in city schools where superintendents are employed expressly for the purpose of relieving the county superintendent of all but actual administrative work.

A native of Placer County, Laird spent his early youth and young manhood in Nevada County, attending the schools at Grass Valley. In the teaching field for ten years, he holds an Unlimited Administrative credential and Life Diploma gained from work started at Humboldt State Teachers' College and completed in actual field work, always keeping in touch with the rapidly changing tendency in the educational field and abreast of the times.

His work in the schools, his cooperation with civic organization in securing better conditions, and his store of knowledge of the needs now faced by Nevada County's rural districts, together with his unquestioned qualifications offers him a background and sound footing upon which to base his platform.

iveness, Laird is vigorously fighting for the establishment of a county library, so that branches may be set up in the rural sections. This step, he declared, is only one needed for furthering educational facilities where they are most needed.

Having worked in the North Star and Empire mines, Laird is familiar with the problems of the working man and his family and promises if elected to permit no class distinction nor bias, but a fair and impartial administration for all.

It is his good fortune to have married Miss Phyllis Anderson, a charming member of a pioneer Nevada County family.

The Sierra Sun is the only paper covering the vast Truckee-Tahoe area.

nounced he has asked the Senate Slush Fund Committee to investigate charges of corrupt or questionable conduct in the campaign to re-elect Senator McAdoo.

"I have no evidence myself of any criminal or questionable character, but other candidates for the Senate have made charges of a most serious nature against McAdoo, his campaign managers and legal associates," the Jeffersonian Democrat said.

Mellen cited the charge by John Preston that Federal job-holders are being assessed 5 per cent of their salaries to contribute to the McAdoo war chest and pointed out in the Federal Criminal Code that it is a Federal offence to solicit or receive campaign funds from government employees, with a penalty of a \$5,000 fine, three years in prison or both.

"Once the Sheppard Committee scratches the surface of this political cess-pool and gets a whiff of the stench arising from it, I know the committee will be forced to go to the bottom of this whole mess. And the further down they go, the worse the stink. It is indeed a job for men with strong stomachs," Mellen said.
